EXPERIENCE

Generative Model Evaluation Intern (Project Elephant)

June 2025 – Nov 2025

Mercor.co

- Evaluated LLM outputs for accuracy, consistency, and user preference alignment using rubric-based assessment frameworks by designing, testing, and reviewing conversational evaluation flows.
- Built human-in-the-loop validation workflows enabling scalable quality assurance and faster iteration cycles.
- Combined qualitative feedback and performance metrics to identify opportunities for model improvement.
- Applied linguistic expertise to shape intent models and optimize user experience in AI-driven interactions.

Human Data Researcher

2019 – 2026

Harvard University

- Led end-to-end data lifecycle work, including data acquisition, cleaning, processing, analysis, and visualization across large-scale multimodal datasets (>100K records).
- Applied statistical analyses to address strategic research questions related to human language and meaning.
- Designed annotation guidelines, evaluation rubrics, and quality-control frameworks for consistency and reliability of human-labeled data.
- Synthesized qualitative and quantitative findings into actionable insights using clear reports, slide decks, and visualizations for (non-)academic partners.
- Maintained documentation, metadata standards, and reproducible workflows supporting data integrity and research governance.
- Communicated analytical findings to diverse academic and administrative audiences through written reports, presentations, and public forums.

Departmental Teaching Fellow and Pedagogy Fellow

Sep 2021 – May 2024

Harvard University

- Designed and led training programs and onboarding processes for diverse learner groups.
- Standardized evaluation criteria and assessment practices across instructional teams for consistency in evaluation and grading standards.
- Trained and coordinated evaluators to maintain consistent review standards.
- Collected and analyzed learner feedback to improve program design, pacing, and engagement.
- Coordinated and delivered structured learning programs, including scheduling, content delivery, and alignment across instructional teams.

SKILLS & TOOLS:

- **AI Evaluation:** LLM evaluation, prompt engineering, human-in-the-loop workflows, evaluation rubrics.
- **Programming:** R, Python (data analysis), SQL (basic).
- **Data Management & Documentation:** Data acquisition and cleaning, metadata creation, data quality validation, reproducible research workflows, documentation of analytical methods.
- **Data Analysis:** Statistical modeling, mixed-methods analysis, A/B testing, experimental design, data pipelines, data annotation, data quality audits.
- **Tools & Platforms:** Qualtrics, Trados, Adobe Animate, Figma (basic), $\LaTeX$.
- **Languages:** English (near-native), Turkish (native), American Sign Language (lower-intermediate), Turkish Sign Language (intermediate)

EDUCATION

Ph.D. in Linguistics

Harvard University, 2026

M.A. in Linguistics

Boğaziçi University, 2019

B.A. in Translation & Interpreting Studies

Boğaziçi University, 2014
